Business Management Software
for the Marine Transportation Industry

BOSS Continues to Expand Service Capabilities to the Industry

We want to take this opportunity to welcome three new BOSS Client rollouts.

We want to welcome CF Industries as Integra's **first Shipper Client** and therefore, our **first BOSS SC** Product client. BOSS SC implements a combination of our **BOSS Barge Line** software and the **BOSS Terminal** software specifically for Shipping companies.

For more information, click on [BOSS SC](#).

We are excited to add **liquid transportation support** with the CFI implementation.

We also want to welcome Savage Services to our BOSS Terminal software. Savage has been using BOSS Barge Line software since 2009 and will now be **adding the Terminal** software to manage their GSS operations.

Rail and Truck Support will be features **added to the Terminal software**.

Integra would also like to welcome Ozinga. They will be implementing the **BOSS MS Terminal** software, **BOSS MS Fleeting** software, and **BOSS MS Barge Line** software.

We are so excited about this opportunity to provide support and assistance to our new clients in their future endeavors and would like to say...

THANK YOU!
